3 **SEC. 2. FINDINGS AND SENSE OF CONGRESS.**

4 (a) FINDINGS.—Congress finds the following:

5 (1) The use of technology in health care and  
 6 coverage of telehealth services are rapidly evolving.

7 (2) Research has found that telehealth services  
 8 can expand access to care, improve the quality of  
 9 care, and reduce spending.

1           (3) In 2021, 91 percent of patients receiving  
2 telehealth services were satisfied with their experi-  
3 ences.

4           (4) Health care workforce shortages are a sig-  
5 nificant problem in many areas and for many types  
6 of health care clinicians.

7           (5) Telehealth increases access to care in areas  
8 with workforce shortages and for individuals who  
9 live far away from health care facilities, have limited  
10 mobility or transportation, or have other barriers to  
11 accessing care.

12           (6) The use of health technologies can strength-  
13 en the expertise of the health care workforce, includ-  
14 ing by connecting clinicians to specialty consulta-  
15 tions.

16           (7) Prior to the COVID–19 pandemic, the utili-  
17 zation of telehealth services in the Medicare program  
18 under title XVIII of the Social Security Act (42  
19 U.S.C. 1395 et seq.) was low, accounting for 0.1  
20 percent of Medicare Part B visits in 2019.

21           (8) Telehealth now represents a critical compo-  
22 nent of care delivery. As of February 2023, 15 per-  
23 cent of Medicare fee-for-service beneficiaries have  
24 had a telehealth service in the past quarter.

1           (9) Long-term certainty about coverage of tele-  
2 health services under the Medicare program is nec-  
3 essary to fully realize the benefits of telehealth.

4           (b) SENSE OF CONGRESS.—It is the sense of Con-  
5 gress that—

6           (1) health care providers can furnish safe, effec-  
7 tive, and high-quality health care services through  
8 telehealth;

9           (2) the Secretary of Health and Human Serv-  
10 ices should promptly take all necessary measures to  
11 ensure that providers and beneficiaries can continue  
12 to furnish and utilize, respectively, telehealth serv-  
13 ices in the Medicare program, including modifying,  
14 as appropriate, the definition of “interactive tele-  
15 communications system” in regulations and program  
16 instruction under the Medicare program to ensure  
17 that providers can utilize all appropriate means and  
18 types of technology, including audio-visual, audio-  
19 only, and other types of technologies, to furnish tele-  
20 health services; and

21           (3) barriers to the use of telehealth should be  
22 removed.
