

118TH CONGRESS
1ST SESSION

H. R. 4624

To prohibit the discriminatory use of personal information by online platforms in any algorithmic process, to require transparency in the use of algorithmic processes and content moderation, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

JULY 13, 2023

Ms. MATSUI (for herself and Mr. MFUME) introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To prohibit the discriminatory use of personal information by online platforms in any algorithmic process, to require transparency in the use of algorithmic processes and content moderation, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Algorithmic Justice
5 and Online Platform Transparency Act”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

1 (1) Online platforms have become integral to
2 individuals' full participation in economic, demo-
3 cratic, and societal processes.

4 (2) Online platforms employ manipulative dark
5 patterns, collect large amounts of personal informa-
6 tion from their users, and leverage that personal in-
7 formation for opaque algorithmic processes in ways
8 that create vastly different experiences for different
9 types of users.

10 (3) Algorithmic processes are often used by on-
11 line platforms without adequate testing and in the
12 absence of critical transparency requirements and
13 other legally enforceable safety and efficacy stand-
14 ards, which has resulted in discrimination in hous-
15 ing, lending, job advertising, and other areas of op-
16 portunity.

17 (4) The use of discriminatory algorithmic proc-
18 esses causes disproportionate harm to populations
19 that already experience marginalization.

20 (5) Online platforms constantly engage in con-
21 tent moderation decision making, resulting in highly
22 influential outcomes regarding what content is visi-
23 ble and accessible to users.

24 (6) Online platforms' content moderation prac-
25 tices have disproportionately significant repercus-

1 sions for members of marginalized communities, who
2 have historically been the target of nefarious online
3 activity, including disinformation campaigns.

4 (7) Users of online platforms should have ac-
5 cess to understandable information about how online
6 platforms moderate content and use algorithmic
7 processes to amplify or recommend content.

8 (8) Users of online platforms should be able to
9 easily move their data to alternative online plat-
10 forms, and the importance of this right is particu-
11 larly significant given certain online platforms' use
12 of harmful algorithmic processes and engagement in
13 ineffective content moderation.

14 (9) In a variety of sectors, algorithmic proc-
15 esses also facilitate discriminatory outcomes on on-
16 line platforms that individuals may not personally
17 interact with, but which nonetheless process the per-
18 sonal information of such individuals and have sig-
19 nificant, negative consequences.

20 (10) The people of the United States would
21 benefit from the convening of experts from a diverse
22 set of governmental positions to collectively study
23 and report on discriminatory algorithmic processes
24 across the United States economy and society, with
25 particular attention to intersections of harm.

1 **SEC. 3. DEFINITIONS.**

10 from a user of an online platform, including the pro-

21 algorithmic process is safe—

22 (A) if the algorithmic process does not
23 produce any disparate outcome as described in
24 the assessment conducted under section
25 4(a)(2)(A)(iv); or

1 (B) if the algorithmic process does produce
2 a disparate outcome as described in the assess-
3 ment conducted under section 4(a)(2)(A)(iv),

5 non-discriminatory, compelling interest, and
6 such interest cannot be satisfied by less dis-
7 criminatory means.

8 (3) EFFECTIVE.—For purposes of paragraph
9 (1), an algorithmic process is effective if the online
10 platform employing or otherwise utilizing the algo-
