## IN THE SENATE OF THE UNITED STATES

MAY 21, 2020

Mr. SCHUMER (for himself and Mr. YOUNG) introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

---

## A BILL

To establish a new Directorate for Technology in the redesignated National Science and Technology Foundation, to establish a regional technology hub program, to require a strategy and report on economic security, science, research, and innovation, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Endless Frontier Act”.

5 **SEC. 2. FINDINGS.**

6 Congress finds the following:

1           (1) For over 70 years, the United States has  
2       been the unequivocal global leader in scientific and  
3       technological innovation, and as a result the people  
4       of the United States have benefitted through good-  
5       paying jobs, economic prosperity, and a higher qual-  
6       ity of life. Today, however, this leadership position  
7       is being eroded and challenged by foreign competi-  
8       tors, some of whom are stealing intellectual property  
9       and trade secrets of the United States and aggres-  
10      sively investing in fundamental research and com-  
11      mercialization to dominate the key technology fields  
12      of the future. While the United States once led the  
13      world in the share of our economy invested in re-  
14      search, our Nation now ranks 9th globally in total  
15      research and development and 12th in publicly fi-  
16      nanced research and development.

17           (2) Without a significant increase in investment  
18      in research, education, technology transfer, and the  
19      core strengths of the United States innovation eco-  
20      system, it is only a matter of time before the global  
21      competitors of the United States overtake the  
22      United States in terms of technological primacy. The  
23      country that wins the race in key technologies—such  
24      as artificial intelligence, quantum computing, ad-

1 vanced communications, and advanced manufac-  
2 turing—will be the superpower of the future.

3 (3) The Federal Government must catalyze  
4 United States innovation by boosting fundamental  
5 research investments focused on discovering, cre-  
6 ating, commercializing, and producing new tech-  
7 nologies to ensure the leadership of the United  
8 States in the industries of the future.

9 (4) The distribution of innovation jobs and in-  
10 vestment in the United States has become largely  
11 concentrated in just a few locations, while much of  
12 the Nation has been left out of growth in the innova-  
13 tion sector. More than 90 percent of the Nation’s in-  
14 novation sector employment growth in the last 15  
15 years was generated in just 5 major cities. The Fed-  
16 eral Government must address this imbalance in op-  
17 portunity by partnering with the private sector to  
18 build new technology hubs across the country,  
19 spreading innovation sector jobs more broadly, and  
20 tapping the talent and potential of the entire Nation  
21 to ensure the United States leads the industries of  
22 the future.

23 (5) Since its inception, the National Science  
24 Foundation has carried out vital work supporting  
25 basic research and people to create knowledge that

1 is a primary driver of the economy of the United  
2 States and enhances the Nation's security.

3 **SEC. 3. NATIONAL SCIENCE AND TECHNOLOGY FOUNDA-**
