Mr. OGLES (for himself, Mrs. HARSHBARGER, Mr. DUNCAN, Mr. WEBER of Texas, Mrs. MILLER of Illinois, Mr. MOORE of Alabama, Mr. KELLY of Mississippi, Mr. GOSAR, Mr. ARRINGTON, Mr. CRENSHAW, Mr. CLYDE, Mr. ALLEN, Mr. SELF, and Mr. ADERHOLT) introduced the following bill; which was referred to the Committee on the Judiciary

# A BILL

To amend title 18, United States Code, to prohibit chemical abortions, and for other purposes.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled,

### **3 SECTION 1. SHORT TITLE.**

4 This Act may be cited as the "Ending Chemical

5 Abortions Act of 2023".

#### 6 SEC. 2. FINDINGS.

7 Congress finds the following:

- 8 (1) In 2000, the Food and Drug Administra-
- 9 tion approved chemical abortion drugs for use in the

United States. The agency illegally categorized preg nancy as an illness and asserted chemical abortion
 drugs provide a meaningful therapeutic benefit.

4 (2) In 2016, the Food and Drug Administra-5 tion reduced the number of doctor visits required for 6 administration of chemical abortion drugs from 3 7 visits to 1 visit. The agency also removed the re-8 quirement for both the in-person administration of 9 misoprostol and a subsequent follow-up appointment. 10 At this time, the agency also expanded the avail-11 ability of inducing a chemical abortion from 7 to 10 12 weeks.

(3) In 2021, the Food and Drug Administration eliminated the in-person dispensing requirement
for chemical abortion drugs, purporting to allow
these drugs to be dispensed by mail in violation of
longstanding Federal law.

(4) When compared to surgical abortions, chemical abortions are consistently more likely to result
in complications that are miscoded as a spontaneous
abortion or "miscarriage".

(5) According to the Guttmacher Institute, the
Abortion Industry's think tank, since 2000, the administration of mifepristone and misoprostol has

 $\mathbf{2}$ 

1	grown to comprise over 50 percent of all induced
2	abortions in the United States.
3	(6) There is a four times higher risk of experi-
4	encing complications due to a chemical abortion than
5	a surgical abortion.
