78B-3-406. Failure to obtain informed consent -- Proof required of patient -- Defenses -- Consent to health care.

(1) (a) When a person submits to health care rendered by a health care provider, it is presumed that actions taken by the health care provider are either expressly or impliedly authorized to be done.

(b) For a patient to recover damages from a health care provider in an action based upon the provider's failure to obtain informed consent, the patient must prove the following:

(i) that a provider-patient relationship existed between the patient and health care provider;

(ii) the health care provider rendered health care to the patient;

(iii) the patient suffered personal injuries arising out of the health care rendered;

(iv) the health care rendered carried with it a substantial and significant risk of causing the patient serious harm;

(v) the patient was not informed of the substantial and significant risk;

(vi) a reasonable, prudent person in the patient's position would not have consented to the health care rendered after having been fully informed as to all facts relevant to the decision to give consent; and

(vii) the unauthorized part of the health care rendered was the proximate cause of personal injuries suffered by the patient.

(2) In determining what a reasonable, prudent person in the patient's position would do under the circumstances, the finder of fact shall use the viewpoint of the patient before health care was provided and before the occurrence of any personal injuries alleged to have arisen from said health care.

(3) It shall be a defense to any malpractice action against a health care provider based upon alleged failure to obtain informed consent if:

(e) the patient or the patient's representative executed a written consent which sets forth the nature and purpose of the intended health care and which contains a declaration that the patient accepts the risk of substantial and serious harm, if any, in hopes of obtaining desired beneficial results of health care and which acknowledges that health care providers involved have explained the patient's condition and the proposed health care in a satisfactory manner and that all questions asked about the health care and its attendant risks have been answered in a manner satisfactory to the patient or the patient's representative.

(4) The written consent shall be a defense to an action against a health care provider based upon failure to obtain informed consent unless the patient proves that the person giving

the consent lacked capacity to consent or shows by clear and convincing evidence that the execution of the written consent was induced by the defendant's affirmative acts of fraudulent misrepresentation or fraudulent omission to state material facts.

(5) This act may not be construed to prevent any person 18 years of age or over from refusing to consent to health care for the patient's own person upon personal or religious grounds.

(6) Except as provided in Section 76-7-304.5, the following persons are authorized and empowered to consent to any health care not prohibited by law:

(7) A person who in good faith consents or authorizes health care treatment or procedures for another as provided by this act may not be subject to civil liability.

(8) Notwithstanding any other provision of this section, if a health care provider fails to comply with the requirement in Section 58-1-509, the health care provider is presumed to have lacked informed consent with respect to the patient examination, as defined in Section 58-1-509.

(9) (a) Notwithstanding any other provision of this section, if a health care provider fails to comply with Subsection 76-7-305(2) before performing an abortion, the health care

459 provider is presumed to have lacked the informed consent of the pregnant woman to perform
460 an abortion.

461 (b) A health care provider may reverse the presumption described in Subsection (9)(a)
462 if the health care provider produces a signed copy of the certificate described in Subsection
