

116TH CONGRESS  
1ST SESSION

# S. RES. 59

Recognizing the duty of the Federal Government to create a Green New Deal.

---

## IN THE SENATE OF THE UNITED STATES

FEBRUARY 7, 2019

Mr. MARKEY (for himself, Mr. MERKLEY, Mr. SANDERS, Mrs. GILLIBRAND, Ms. HARRIS, Ms. WARREN, Ms. HIRONO, Mr. WYDEN, Mr. BLUMENTHAL, Mr. BOOKER, Ms. KLOBUCHAR, and Mr. MURPHY) submitted the following resolution; which was referred to the Committee on Environment and Public Works

---

# RESOLUTION

Recognizing the duty of the Federal Government to create a Green New Deal.

Whereas the October 2018 report entitled “Special Report on Global Warming of 1.5 C” by the Intergovernmental Panel on Climate Change and the November 2018 Fourth National Climate Assessment report found that—

(1) human activity is the dominant cause of observed climate change over the past century;

(2) a changing climate is causing sea levels to rise and an increase in wildfires, severe storms, droughts, and other extreme weather events that threaten human life, healthy communities, and critical infrastructure;

(3) global warming at or above 2 degrees Celsius beyond pre-industrialized levels will cause—

(A) mass migration from the regions most affected by climate change;

(B) more than \$500,000,000,000 in lost annual economic output in the United States by the year 2100;

(C) wildfires that, by 2050, will annually burn at least twice as much forest area in the western United States than was typically burned by wildfires in the years preceding 2019;

(D) a loss of more than 99 percent of all coral reefs on Earth;

(E) more than 350,000,000 more people to be exposed globally to deadly heat stress by 2050; and

(F) a risk of damage to \$1,000,000,000,000 of public infrastructure and coastal real estate in the United States; and

(4) global temperatures must be kept below 1.5 degrees Celsius above pre-industrialized levels to avoid the most severe impacts of a changing climate, which will require—

(A) global reductions in greenhouse gas emissions from human sources of 40 to 60 percent from 2010 levels by 2030; and

(B) net-zero global emissions by 2050;

Whereas, because the United States has historically been responsible for a disproportionate amount of greenhouse gas emissions, having emitted 20 percent of global greenhouse gas emissions through 2014, and has a high technological capacity, the United States must take a leading role in reducing emissions through economic transformation;

Whereas the United States is currently experiencing several related crises, with—

(1) life expectancy declining while basic needs, such as clean air, clean water, healthy food, and adequate health care, housing, transportation, and education, are inaccessible to a significant portion of the United States population;

(2) a 4-decade trend of wage stagnation, deindustrialization, and anti-labor policies that has led to—

(A) hourly wages overall stagnating since the 1970s despite increased worker productivity;

(B) the third-worst level of socioeconomic mobility in the developed world before the Great Recession;

(C) the erosion of the earning and bargaining power of workers in the United States; and

(D) inadequate resources for public sector workers to confront the challenges of climate change at local, State, and Federal levels; and

(3) the greatest income inequality since the 1920s, with—

(A) the top 1 percent of earners accruing 91 percent of gains in the first few years of economic recovery after the Great Recession;

(B) a large racial wealth divide amounting to a difference of 20 times more wealth between the average White family and the average Black family; and

(C) a gender earnings gap that results in women earning approximately 80 percent as much as men, at the median;

Whereas climate change, pollution, and environmental destruction have exacerbated systemic racial, regional, so-

cial, environmental, and economic injustices (referred to in this preamble as “systemic injustices”) by disproportionately affecting indigenous peoples, communities of color, migrant communities, deindustrialized communities, depopulated rural communities, the poor, low-income workers, women, the elderly, the unhoused, people with disabilities, and youth (referred to in this preamble as “frontline and vulnerable communities”);

Whereas, climate change constitutes a direct threat to the national security of the United States—

(1) by impacting the economic, environmental, and social stability of countries and communities around the world; and

(2) by acting as a threat multiplier;

Whereas the Federal Government-led mobilizations during World War II and the New Deal created the greatest middle class that the United States has ever seen, but many members of frontline and vulnerable communities were excluded from many of the economic and societal benefits of those mobilizations; and

Whereas the Senate recognizes that a new national, social, industrial, and economic mobilization on a scale not seen since World War II and the New Deal era is a historic opportunity—

(1) to create millions of good, high-wage jobs in the United States;

(2) to provide unprecedented levels of prosperity and economic security for all people of the United States; and

(3) to counteract systemic injustices: Now, therefore, be it

1       *Resolved*, That it is the sense of the Senate that—

1           (1) it is the duty of the Federal Government to  
2       create a Green New Deal—

3               (A) to achieve net-zero greenhouse gas  
4       emissions through a fair and just transition for  
5       all communities and workers;

6               (B) to create millions of good, high-wage  
7       jobs and ensure prosperity and economic secu-  
8       rity for all people of the United States;

9               (C) to invest in the infrastructure and in-  
10      dustry of the United States to sustainably meet  
11      the challenges of the 21st century;

12              (D) to secure for all people of the United  
13      States for generations to come—

14                   (i) clean air and water;

15                   (ii) climate and community resiliency;

16                   (iii) healthy food;

17                   (iv) access to nature; and

18                   (v) a sustainable environment; and

19              (E) to promote justice and equity by stop-  
20      ping current, preventing future, and repairing  
21      historic oppression of indigenous peoples, com-  
22      munities of color, migrant communities,  
23      deindustrialized communities, depopulated rural  
24      communities, the poor, low-income workers,  
25      women, the elderly, the unhoused, people with

1 disabilities, and youth (referred to in this reso-  
 2 lution as “frontline and vulnerable commu-  
 3 nities”);

4 (2) the goals described in subparagraphs (A)  
 5 through (E) of paragraph (1) (referred to in this  
 6 resolution as the “Green New Deal goals”) should  
 7 be accomplished through a 10-year national mobili-  
 8 zation (referred to in this resolution as the “Green  
 9 New Deal mobilization”) that will require the fol-  
 10 lowing goals and projects—

11 (A) building resiliency against climate  
 12 change-related disasters, such as extreme  
 13 weather, including by leveraging funding and  
 14 providing investments for community-defined  
 15 projects and strategies;

16 (B) repairing and upgrading the infra-  
 17 structure in the United States, including—

18 (i) by eliminating pollution and green-  
 19 house gas emissions as much as techno-  
 20 logically feasible;

21 (ii) by guaranteeing universal access  
 22 to clean water;

23 (iii) by reducing the risks posed by cli-  
 24 mate impacts; and

1 (iv) by ensuring that any infrastruc-  
2 ture bill considered by Congress addresses  
3 climate change;

4 (C) meeting 100 percent of the power de-  
5 mand in the United States through clean, re-  
6 newable, and zero-emission energy sources, in-  
7 cluding—

8 (i) by dramatically expanding and up-  
9 grading renewable power sources; and

10 (ii) by deploying new capacity;

11 (D) building or upgrading to energy-effi-  
12 cient, distributed, and “smart” power grids,  
13 and ensuring affordable access to electricity;

14 (E) upgrading all existing buildings in the  
15 United States and building new buildings to  
16 achieve maximum energy efficiency, water effi-  
17 ciency, safety, affordability, comfort, and dura-  
18 bility, including through electrification;

19 (F) spurring massive growth in clean man-  
20 ufacturing in the United States and removing  
21 pollution and greenhouse gas emissions from  
22 manufacturing and industry as much as is tech-  
23 nologically feasible, including by expanding re-  
24 newable energy manufacturing and investing in  
25 existing manufacturing and industry;

(G) working collaboratively with farmers and ranchers in the United States to remove pollution and greenhouse gas emissions from the agricultural sector as much as is technologically feasible, including—

(i) by supporting family farming;

(ii) by investing in sustainable farming and land use practices that increase soil health; and

(iii) by building a more sustainable food system that ensures universal access to healthy food;

(H) overhauling transportation systems in the United States to remove pollution and greenhouse gas emissions from the transportation sector as much as is technologically feasible, including through investment in—

(i) zero-emission vehicle infrastructure and manufacturing;

(ii) clean, affordable, and accessible public transit; and

(iii) high-speed rail;

(I) mitigating and managing the long-term adverse health, economic, and other effects of pollution and climate change, including by pro-

1       viding funding for community-defined projects  
2       and strategies;

3               (J) removing greenhouse gases from the  
4       atmosphere and reducing pollution by restoring  
5       natural ecosystems through proven low-tech so-  
6       lutions that increase soil carbon storage, such  
7       as land preservation and afforestation;

8               (K) restoring and protecting threatened,  
9       endangered, and fragile ecosystems through lo-  
10      cally appropriate and science-based projects  
11      that enhance biodiversity and support climate  
12      resiliency;

13              (L) cleaning up existing hazardous waste  
14      and abandoned sites, ensuring economic devel-  
15      opment and sustainability on those sites;

16              (M) identifying other emission and pollu-  
17      tion sources and creating solutions to remove  
18      them; and

19              (N) promoting the international exchange  
20      of technology, expertise, products, funding, and  
21      services, with the aim of making the United  
22      States the international leader on climate ac-  
23      tion, and to help other countries achieve a  
24      Green New Deal;

1           (3) a Green New Deal must be developed  
 2           through transparent and inclusive consultation, col-  
 3           laboration, and partnership with frontline and vul-  
 4           nerable communities, labor unions, worker coopera-  
 5           tives, civil society groups, academia, and businesses;  
 6           and

7           (4) to achieve the Green New Deal goals and  
 8           mobilization, a Green New Deal will require the fol-  
 9           lowing goals and projects—

10               (A) providing and leveraging, in a way that  
 11               ensures that the public receives appropriate  
 12               ownership stakes and returns on investment,  
 13               adequate capital (including through community  
 14               grants, public banks, and other public financ-  
 15               ing), technical expertise, supporting policies,  
 16               and other forms of assistance to communities,  
 17               organizations, Federal, State, and local govern-  
 18               ment agencies, and businesses working on the  
 19               Green New Deal mobilization;

20               (B) ensuring that the Federal Government  
 21               takes into account the complete environmental  
 22               and social costs and impacts of emissions  
 23               through—

24                       (i) existing laws;

25                       (ii) new policies and programs; and

1 (iii) ensuring that frontline and vul-  
2 nerable communities shall not be adversely  
3 affected;

4 (C) providing resources, training, and  
5 high-quality education, including higher edu-  
6 cation, to all people of the United States, with  
7 a focus on frontline and vulnerable commu-  
8 nities, so that all people of the United States  
9 may be full and equal participants in the Green  
10 New Deal mobilization;

11 (D) making public investments in the re-  
12 search and development of new clean and re-  
13 newable energy technologies and industries;

14 (E) directing investments to spur economic  
15 development, deepen and diversify industry and  
16 business in local and regional economies, and  
17 build wealth and community ownership, while  
18 prioritizing high-quality job creation and eco-  
19 nomic, social, and environmental benefits in  
20 frontline and vulnerable communities, and  
21 deindustrialized communities, that may other-  
22 wise struggle with the transition away from  
23 greenhouse gas intensive industries;

24 (F) ensuring the use of democratic and  
25 participatory processes that are inclusive of and

1 led by frontline and vulnerable communities and  
2 workers to plan, implement, and administer the  
3 Green New Deal mobilization at the local level;

4 (G) ensuring that the Green New Deal mo-  
5 bilization creates high-quality union jobs that  
6 pay prevailing wages, hires local workers, offers  
7 training and advancement opportunities, and  
8 guarantees wage and benefit parity for workers  
9 affected by the transition;

10 (H) guaranteeing a job with a family-sus-  
11 taining wage, adequate family and medical  
12 leave, paid vacations, and retirement security to  
13 all people of the United States;

14 (I) strengthening and protecting the right  
15 of all workers to organize, unionize, and collec-  
16 tively bargain free of coercion, intimidation, and  
17 harassment;

18 (J) strengthening and enforcing labor,  
19 workplace health and safety, antidiscrimination,  
20 and wage and hour standards across all employ-  
21 ers, industries, and sectors;

22 (K) enacting and enforcing trade rules,  
23 procurement standards, and border adjustments  
24 with strong labor and environmental protec-  
25 tions—

1 (i) to stop the transfer of jobs and  
2 pollution overseas; and

3 (ii) to grow domestic manufacturing  
4 in the United States;

5 (L) ensuring that public lands, waters, and  
6 oceans are protected and that eminent domain  
7 is not abused;

8 (M) obtaining the free, prior, and informed  
9 consent of indigenous peoples for all decisions  
10 that affect indigenous peoples and their tradi-  
11 tional territories, honoring all treaties and  
12 agreements with indigenous peoples, and pro-  
13 tecting and enforcing the sovereignty and land  
14 rights of indigenous peoples;

15 (N) ensuring a commercial environment  
16 where every businessperson is free from unfair  
17 competition and domination by domestic or  
18 international monopolies; and

19 (O) providing all people of the United  
20 States with—

21 (i) high-quality health care;

22 (ii) affordable, safe, and adequate  
23 housing;

24 (iii) economic security; and

- 1 (iv) clean water, clean air, healthy and
- 2 affordable food, and access to nature.
