A BILL

To amend the Public Health Service Act to improve reproductive health care of individuals with disabilities.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Reproductive Health
5 Care Accessibility Act”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

1 (1) In the United States, approximately 1 in 4
2 adults have some type of disability, more than 1 in
3 10 individuals with disabilities can become pregnant,
4 and over 4,100,000 people are parents with disabili-
5 ties.

6 (2) All people, including individuals with dis-
7 abilities, have the right to decide if, when, and how
8 to start and raise a family as well as have healthy
9 pregnancies and postpartum periods.

10 (3) Title II and III of the Americans with Dis-
11 abilities Act of 1990 (42 U.S.C. 12131 et seq. and
12 12181 et seq.), section 504 of the Rehabilitation Act
13 of 1973 (29 U.S.C. 794), and section 1557 of the
14 Patient Protection and Affordable Care Act (42
15 U.S.C. 18116) provide individuals with disabilities
16 with the right to equitably access and receive health
17 care.

18 (4) Disabled people face unique barriers when
19 accessing reproductive health care, including accessi-
20 bility issues at health care facilities, lack of acces-
21 sible medical diagnostic equipment, barriers to ac-
22 cessible travel, delay in receiving preventative serv-
23 ices, and lack of health care providers with training
24 and knowledge on the needs of individuals with dis-
25 abilities receiving reproductive health care.

1 (5) Reproductive health care is critical to a per-
2 son's long-term health. Disabled people have higher
3 mortality rates from reproductive related cancers
4 often due to lack of access to reproductive health
5 care.

6 (6) The United States Access Board has estab-
7 lished standards for accessible medical diagnostic
8 equipment; however without enforceable standards
9 adopted by the Department of Health and Human
10 Services and Department of Justice, systemic im-
11 provements in the availability of accessible medical
12 diagnostic equipment will not be achieved.

13 (7) Disabled people have an equal right to re-
14 productive autonomy, but harmful stereotypes about
15 people with disabilities create barriers to getting
16 care that respects that autonomy.

17 (8) Laws that restrict access to reproductive
18 health care, including abortion care,
19 disproportionally harm people who already face bar-
20 riers to reproductive health care, which includes dis-
21 abled people.

22 (9) Individuals with and without disabilities
23 want children at the same frequency, but individuals
24 with disabilities are less likely to receive contracep-
25 tion counseling and timely prenatal care, experience

1 a higher rate of sterilization, and are at a greater
2 risk for adverse pregnancy outcomes.

3 (10) Diversity and inclusion in the health care
4 workforce is a critical factor in the delivery of high-
5 quality, culturally competent health care and im-
6 proves patient outcomes. However, the rate of stu-
7 dents and trainees with disabilities in medical and
8 allied health education remains low compared to
9 those without disabilities.

10 **SEC. 3. PROGRAM FOR TRAINING THE WORKFORCE.**
