

Contamination of the “Vaccines” Made with ‘Process 2,’ the Formulation Released Publicly

Kevin McKernan, a former team leader in the Human Genome Project and expert in DNA and RNA sequencing, concluded that **both Pfizer and Moderna vials of vaccine were contaminated with plasmid DNA**. [According to genome.gov](#), “A plasmid is a small circular DNA molecule found in bacteria and some other microscopic organisms...They typically have a small number of genes...and can be passed from one cell to another.” And, [genome.gov states](#), DNA is “the molecule that **carries genetic information** for the development and functioning of an organism.” [Emphasis added.] **Plasmid DNA is NOT supposed to be in the mRNA COVID “vaccines,” especially at the levels detected**. As [McKernan stated](#), “...all products tested exceeded the guidelines for residual DNA set by the FDA...**Our findings extend existing concerns about vaccine safety...**” [Emphasis added.] [STAT](#) reported, “...host cell DNA contamination that is not detected and filtered properly can have dire consequences for the patient who receives a contaminated therapy...” So, when will we know the extent of what happens when unacceptable levels of foreign genetic material are introduced into human bodies? Perhaps some clues are already surfacing.

For example, think about those who died of or are currently being treated for a ‘turbo cancer.’ [“SARS-CoV-2 Vaccination and the Multi-Hit Hypothesis of Oncogenesis”](#) states, “...we are particularly **concerned that certain COVID-19 vaccines may...predispose(s) some (stable) oncologic patients and survivors to cancer progression, recurrence, and/or metastasis.**” [Cancer.gov says](#), “Cancer is caused by certain changes to genes.” Could some of those changes be from foreign genetic material entering and altering cells? It certainly seems possible.

Worldwide Concerns that the COVID-19 “Vaccines” Are Gene Therapies

In Australia, [recent litigation disclosed](#), “It is alleged the **Covid-19 vaccines...produced by...Pfizer and Moderna satisfy the Australian legal definitions for being deemed Genetically Modified Organisms.**” Additionally, Australia’s Gene Technology Regulator, [Dr. Raj Bhula, gave evidence that the modified RNA \(modRNA\) products do involve gene technology](#), which “...under the [Gene Technology Act](#), an approval would have been required.” One wonders why it has taken three years for this concern to be identified rather than before this “gene technology” was introduced into billions of human bodies.

Growing Evidence of Excess Mortality and Disability

Recently, a whistleblower, an employee of the New Zealand Ministry of Health, presented anonymized statistical information that indicates **a high number of excess deaths** since the experimental, gene-based therapy COVID injections roll-out. <https://nzdsos.com/2023/12/07/whistleblower-data-release/> The whistleblower warned, “There is no possible way that this data is consistent with a safe vaccine.”

Furthermore, Edward Dowd, the founder of Phinance Technologies, has gathered **excess mortality and disability data from insurance actuaries and the Bureau of Labor Statistics showing unprecedented increases across all age groups since the “vaccine” rollouts.** <https://phinancetechnologies.com/HumanityProjects/Projects.htm>

Deaths and Harms Alone Dictate that mRNA Products and Platform Need to Be Halted

Since the COVID “vaccines” are **gene therapy products** developed using an mRNA platform but were not studied and evaluated as gene therapy products, an array of unanticipated and undesirable outcomes is possible. Additionally, long-term safety studies cannot be performed, because billions of people worldwide received at least one dose of a COVID-19 “vaccine,” thus leaving very few placebo group candidates. Even without those safety studies, we are seeing the health-related fallout of the “vaccines” on daily basis – cardiac issues in those who should not have them, turbo cancers, Sudden Adult Death Syndrome, young athletes regularly collapsing during exercise, and more.
